ENVIRONMENTAL SCIENCE**Paper 2 (Generated practice paper - Set 11)**

Assessed: The living environment, Biological resources, Sustainability, Research methods

Time allowed: 3 hours**Materials**

For this paper you may use:

- a calculator.

Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions 1 to 10 and **one** essay from question 11.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 120.
- All questions should be answered in continuous prose.
- You will be assessed on your ability to:
 - use good English
 - organise information clearly
 - use specialist vocabulary where appropriate.

For Examiner's Use

Answer all questions in the spaces provided.

0	1
---	---

 .

1

 Describe how each of the following threatens Antarctica.

[4 marks]

Global climate change

.....

Ozone depletion

.....

Tourism

.....

Future mineral exploitation

.....

0	1
---	---

 .

2

 Describe the main features of the Antarctic Treaty (1959) and the regulations that protect Antarctica.

[6 marks]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

10

0 2 . 1

Explain how living organisms provide each of the following ecosystem services.

[6 marks]

Regulation of atmospheric composition

.....

.....

.....

Soil maintenance

.....

.....

.....

Interspecies relationships

.....

.....

.....

0 2 . 2

Explain why Darwin's orchid of Madagascar depends on a single moth species, and why such specialisation is both an advantage and a risk.

[2 marks]

.....

.....

.....

.....

0 2 . 3

Explain why elephants are particularly important seed dispersers.

[2 marks]

.....

.....

.....

.....

10

0	3	.	1
---	---	---	---

Compare selective breeding, asexual reproduction and cross-breeding as methods of improving livestock or crops.

[6 marks]

0	3	.	2
---	---	---	---

Explain how artificial insemination and embryo transfer increase the rate at which desirable characteristics spread through a livestock population.

[4 marks]

10

0 4

Table 1 compares nitrogen fixation by Rhizobium bacteria in legume root nodules with the Haber process.

Table 1

Feature	Biological fixation	Haber process
Energy source	Sunlight captured by the plant (carbohydrates)	Fossil fuels (natural gas / coal)
Temperature	Soil temperature (10-30 °C)	About 450 °C
Pressure	Atmospheric	200 atmospheres
Catalyst	Nitrogenase enzyme	Iron
Energy density of input	Low	High
Waste products	None - all products used	CO ₂ , NO _x

0 4**. 1**

Use Table 1 to explain how natural processes differ from human industrial processes in their use of energy.

[4 marks]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

0 4**. 2**

Give **three** other natural processes driven by solar energy that human society depends on.

[3 marks]

1

.....

2

.....

3

.....

0 4 . 3

Explain how the principle of low-temperature natural processes is being applied in human systems.

[3 marks]

.....

.....

.....

.....

.....

.....

10

0 5

Table 1 compares extensive oyster farming with intensive salmon farming.

Table 1

Feature	Extensive oyster farm	Intensive salmon farm
Food input	None - filter natural plankton	Fishmeal / plant pellets
Stocking density	Low, spaced on seabed	High, in sea cages / tanks
Breeding	Wild spat settle on cleared seabed or hatchery	Selected adults stripped of eggs and milt
Disease / pest control	Removal of predatory crabs	Antibiotics, pesticides, wrasse, removal of diseased fish
Yield per hectare	Low	Very high

0 5 . 1

Use Table 1 to explain the relative merits of extensive and intensive aquaculture.

[4 marks]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

0 5 . 2

Describe the stages in breeding and rearing salmon in an intensive farm.

[3 marks]

0 5 . 3

Explain how shrimp farming has affected mangroves and how disease is controlled in shrimp lagoons.

[3 marks]

10

0 6 . 1

Explain why an electronic meter used to measure dissolved oxygen must be calibrated, and what should be done if the reading cannot be adjusted.

[2 marks]

0 6 . 2

Give **three** types of indirect evidence of the presence of an animal and the information each can provide.

[3 marks]

1

2

3

0 6 . 3 Explain how auditory monitoring can be used to study bats. **[2 marks]**

.....

.....

.....

0 6 . 4 Explain **three** assumptions of the mark-release-recapture method that may not be met. **[3 marks]**

.....

.....

.....

.....

.....

.....

.....

10

07 . 1

A student measured the pH of a stream with a meter that reads to 0.01 pH units but had not been calibrated. Which statement is correct? Tick **one** box.

[1 mark]

A The readings are precise but may not be accurate

☐

B The readings are accurate but not precise

☐

C The readings are both accurate and precise

☐

D The readings are reliable because the meter is electronic

☐

07 . 2

Explain what is meant by an **anomalous result** and how a student should decide whether to include it.

[2 marks]

.....

.....

.....

.....

07 . 3

Explain why a preliminary study is carried out before the main investigation.

[2 marks]

.....

.....

.....

.....

5

0 8

Figure 1 shows the area of forest lost each year in three regions between 1990 and 2020.

Figure 1

0 8

. 1

Describe the trends shown in Figure 1.

[3 marks]

0 8

. 2

Explain the main causes of forest loss in South America and Africa.

[4 marks]

08 . 3

Explain why roads and railways cause more forest loss than the area they occupy.

[2 marks]

08 . 4

Explain why softwood from Scandinavia and Canada is generally produced more sustainably than tropical hardwood.

[1 mark]

10

09 . 1

Describe how cloning could be used to conserve the northern white rhinoceros, and explain why success has been limited.

[3 marks]

09 . 2

Explain how micro-propagation and cloning are used to conserve rare plants such as the Atlantic black poplar.

[3 marks]

09 . 3

Describe the purpose and methods of the Millennium Seed Bank.

[4 marks]

10

10 . 1

Discuss the strategies that can be used to increase the sustainability of agriculture.

[9 marks]

[illegible]

10 . 2 State what is meant by **permaculture**.

[1 mark]

10

Write an essay on one of the following topics.

$$\boxed{1} \boxed{1} . \boxed{1}$$

Using named examples, discuss how the ecological features of a habitat determine its importance, the threats it faces and the conservation strategies that are appropriate.

[25 marks]

OR

1 1 . 2

Discuss how human activities influence biodiversity, using examples from a range of different contexts.

[25 marks]

Indicate which question you have answered by writing its number, **11 . 1** or **11 . 2**, at the top of your answer.

This image shows a full page of a document template designed for writing. It features a series of evenly spaced, horizontal grey lines across the entire width of the page, providing a guide for letter height and alignment. The background is a solid light blue-grey color, which contrasts subtly with the white lines. There are no margins, headers, footers, or other markings present on the page.
