Questions by topic: Mineral resources (the lithosphere) - Set 2 (20 marks)

Answer all questions in the spaces provided.

0 1 Table 1 compares the energy used to produce 1 tonne of aluminium from bauxite ore with the energy used to produce 1 tonne from recycled aluminium cans.

Table 1

Source	Energy used / GJ per tonne	CO_2 emitted / tonnes per tonne of aluminium
Bauxite ore (extraction, refining, smelting)	210	12
Recycled cans (collection, sorting, remelting)	12	0.7

0 1 . 1 Calculate the percentage energy saving from recycling aluminium rather than extracting it from ore.

[2 marks]

Answer ☐ %

0 1 . 2 Give **three** advantages of recycling metals other than energy saving.
