Questions by topic: Energy & material cycles: natural vs human systems - Set 1 (40 marks)

Answer all questions in the spaces provided.

0 1 Table 1 compares nitrogen fixation by Rhizobium bacteria in legume root nodules with the Haber process.

Table 1

Feature	Biological fixation	Haber process
Energy source	Sunlight captured by the plant (carbohydrates)	Fossil fuels (natural gas / coal)
Temperature	Soil temperature (10-30 °C)	About 450 °C
Pressure	Atmospheric	200 atmospheres
Catalyst	Nitrogenase enzyme	Iron
Energy density of input	Low	High
Waste products	None - all products used	CO_2, NOx

0 1 . 1 Use Table 1 to explain how natural processes differ from human industrial processes in their use of energy.

[4 marks]

0 2 . 2 Explain why the use of toxic metals in electronic products is a particular problem for sustainability.

[2 marks]

.....

.....

.....

.....

0 2 . 3 Describe how the design of a product can move it from a linear to a cyclical system.

[4 marks]

.....

.....

.....

.....

.....

.....

.....

.....

.....

10

0 3 . 1 Give **two** natural processes that are driven by solar energy.

[2 marks]

1 .....

.....

2 .....

.....

0 3 . 2 Explain why natural processes can take place at low temperatures.

[2 marks]

.....

.....

Do not write outside the box

Do not write outside the box

0 3 . 3 Give **one** human activity that uses high temperatures to achieve a result that natural systems achieve at low temperature.

[1 mark]

5

0 4 . 1 Complete Table 1 to compare natural systems with typical linear human systems.

[4 marks]

Table 1

Feature	Natural systems	Linear human systems	
Energy source			
Use of materials			
Nature of wastes			
Temperature of processes			

0 4 . 2 Explain why natural systems can be sustained using a relatively small number of elements.

[2 marks]

Do not write outside the box

.....

0 4 . 3 Explain why the human use of minerals makes them difficult to recover and re-use.

[2 marks]

.....

.....

.....

.....

0 4 . 4 Explain why toxic metals in electronic products cause problems that the wastes of natural systems do not.

[2 marks]

.....

.....

.....

.....

10

0 5 . 1 Which of the following is a feature of natural systems? Tick **one** box.

[1 mark]

A Reactions that require high temperatures ☐

B Reliance on non-renewable energy ☐

C Waste products that are the raw materials for other processes ☐

D Dispersal of elements so they cannot be re-used ☐

0 5 . 2 Explain why nitrogen fixation by bacteria is more sustainable than the Haber process.

[2 marks]

.....

.....

.....

.....

0 5 . 3 Explain why incineration of wastes is less sustainable than natural decomposition.
