ENVIRONMENTAL SCIENCE**Paper 2 (Generated practice paper - Set 07)**

Assessed: The living environment, Biological resources, Sustainability, Research methods

Time allowed: 3 hours**Materials**

For this paper you may use:

- a calculator.

Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions 1 to 10 and **one** essay from question 11.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 120.
- All questions should be answered in continuous prose.
- You will be assessed on your ability to:
 - use good English
 - organise information clearly
 - use specialist vocabulary where appropriate.

For Examiner's Use

TOTAL	

Answer all questions in the spaces provided.

0 1 . 1

Explain the difference between primary and secondary succession and why secondary succession is faster.

[3 marks]

.....

.....

.....

.....

.....

.....

0 1 . 2

Explain what is meant by **deflected succession** and a **plagioclimax**, using a named UK example.

[3 marks]

.....

.....

.....

.....

.....

.....

0 1 . 3

Explain why conservation of a plagioclimax requires continued human activity whereas conservation of a rainforest or coral reef does not.

[2 marks]

.....

.....

.....

0 1 . 4

Explain why biodiversity tends to be low in abiotically extreme environments and high in stable ones.

[2 marks]

.....

10

0 2 . 1

Give **two** habitats created by farming that support important wildlife communities.

[2 marks]

1

2

0 2 . 2

Explain how drainage and nutrient enrichment of farmland reduce biodiversity.

[2 marks]

0 2 . 3

Explain **one** problem that can be caused by introducing a biological control species.

[1 mark]

5

03 . 1

Explain how each of the following new technologies improves the validity of ecological research.

[8 marks]

Satellite / radio / GPS tracking

.....

.....

.....

DNA databases and eDNA

.....

.....

.....

Image recognition software

.....

.....

.....

Acoustic monitoring / sonograms

.....

.....

.....

03 . 2

Explain why new technologies allow the collection of 'more representative' data.

[2 marks]

.....

.....

.....

.....

10

0 4

The Isle of Eigg (area 31 km², population about 100) is not connected to the national grid. Table 1 shows its electricity sources.

Table 1

Source	Capacity / kW
Hydroelectric (3 generators)	110
Solar PV	50
Wind (4 turbines)	24
Diesel generators (back-up)	160

0 4

. 1

Explain why Eigg uses a mix of three renewable resources rather than one, and why diesel back-up is still needed.

[3 marks]

.....

.....

.....

.....

.....

.....

.....

0 4

. 2

Describe **three** other ways in which the Eigg community has increased its sustainability.

[3 marks]

1

2

3

0 4

. 3

Explain why small self-contained communities often find it easier to adopt sustainable lifestyles than large cities.

[2 marks]

.....

.....

.....

0 4 . 4

Explain how large-scale DC electricity grids such as Desertec could increase the use of renewable energy.

[2 marks]

10

0 5 . 1

Explain why **proxy data** are needed to study the early conditions on Earth.

[1 mark]

0 5 . 2

Complete Table 1 to show what each analytical technique can be used to estimate.

[4 marks]

Table 1

Technique	What it estimates	
Ratio of carbon-12 to carbon-14 in a sample		
Ratio of oxygen-18 to oxygen-16		
Analysis of air bubbles trapped in ice cores		
Ratio of magnesium to calcium in calcite deposits		

0 5 . 3

Explain why an understanding of continental drift and ocean currents has been important in explaining past changes in conditions.

[2 marks]

0 5 . 4

Life probably first developed around volcanic vents on the seabed. Explain why the conditions in the oceans were more suitable than those on land 3.5 billion years ago.

[3 marks]

10

0 6

The Russell formula describes changes in a fish stock: $S_2 = S_1 + (A + G) - (C + M)$, where S_1 and S_2 are the stock biomass at the start and end of the year, A = recruitment of young fish, G = growth, C = catch and M = natural mortality. Table 1 gives estimates for a cod stock.

Table 1

Term	Biomass / thousand tonnes
S_1	600
A	90
G	150
C	220
M	80

0 6 . 1

Calculate S_2 and state whether the stock is being fished sustainably.

[2 marks]

Answer thousand tonnes

0 6 . 2 Calculate the maximum catch that would have kept the stock constant. **[1 mark]**

Answer thousand tonnes

0 6 . 3 Explain why the catch is the only term in the formula that is easy to measure, and why the others are difficult. **[3 marks]**

.....

.....

.....

.....

.....

.....

.....

0 6 . 4 Describe how each of the following measures obtained from commercial catches can indicate overfishing. **[4 marks]**

Catch per unit fishing effort

.....

.....

.....

Mean fish size and mean age

.....

.....

.....

10

07 . 1

Explain why the ecosystem services provided by other species are often given a low conservation priority.

[2 marks]

.....

.....

.....

.....

07 . 2

Explain how soil organisms provide services that humans depend on.

[3 marks]

.....

.....

.....

.....

.....

.....

.....

07 . 3

Explain why pollination by insects is more useful than wind pollination to plants growing in forests.

[2 marks]

.....

.....

07 . 4

Explain how seed dispersal by animals increases the survival of a plant's offspring.

[3 marks]

10

08

Table 1 shows climate data for two sites where a farmer is considering growing maize, a frost-sensitive crop that needs a thermal growing season of at least 120 days.

Table 1

Feature	Site A: valley floor	Site B: south-facing slope
Frost-free period / days	110	150
Days with mean temperature above 5 °C	160	175
Mean summer rainfall / mm	180	150
Gradient / %	1	8

08 . 1

Use Table 1 to explain which site is more suitable for maize.

[3 marks]

08 . 2

Describe **three** ways in which temperature can be controlled to increase crop productivity.

[3 marks]

1

.....

2

.....

3

.....

08 . 3

Explain why keeping livestock warm increases the amount of food converted to growth.

[2 marks]

.....

.....

.....

.....

08 . 4

Explain how day length affects livestock production and how it can be manipulated.

[2 marks]

.....

.....

.....

.....

10

09

Table 1 shows typical energy values for an agroecosystem. Values are units of energy remaining from 100 000 units of solar energy.

Table 1

Stage	Energy / arbitrary units
Solar energy reaching the crop	100 000
Energy captured during photosynthesis	4 000
Energy stored in crop biomass	1 000

09**1**

Calculate the percentage of the solar energy reaching the crop that is stored in crop biomass.

[1 mark]**Answer**

%**09****2**

Explain why so little of the solar energy is stored in the crop.

[3 marks]

.....

.....

.....

.....

.....

.....

.....

09**3**

Explain why few food chains have more than four trophic levels.

[2 marks]

.....

.....

.....

.....

09**4**

Explain why rearing sheep or cattle is the best option for food production in upland and semi-arid areas.

[2 marks]

09 . 5

Explain how pigs can increase the efficiency of a food production system.

[2 marks]

10

10 . 1

Describe the conservation efforts used to protect tropical rainforests and evaluate their effectiveness.

[9 marks]

[illegible]

State **one** reason why rainforest conservation is important to countries far from the tropics.

ESP/7447/2/SET07

Do not write outside the box

10

Write an essay on one of the following topics.

$$\boxed{1} \boxed{1} . \boxed{1}$$

Using tropical coral reefs as an example, discuss how the ecological features of a habitat determine both its importance and its vulnerability to human activities.

[25 marks]

OR

1 1 . 2

Discuss how feedback mechanisms, tipping points and diversity influence the stability of natural systems, and how human activities affect them.

[25 marks]

Indicate which question you have answered by writing its number, **11 . 1** or **11 . 2**, at the top of your answer.

[illegible]

[illegible]

Do not write outside the box
