

Questions by topic: Renewable energy technologies - Set 1 (80 marks)

Answer all questions in the spaces provided.

0 1

Table 1 shows the efficiency and cost of four types of solar photovoltaic (PV) cell.

Table 1

PV cell type	Efficiency / %	Relative cost per m ²
Amorphous silicon (thin film)	8	1
Polycrystalline silicon	16	2
Monocrystalline silicon with anti-reflective surface	22	3
Multi-junction cell	40	25

0 1

. 1

Describe how a photovoltaic cell generates electricity.

[2 marks]

.....

.....

.....

.....

0 1

. 2

Explain how anti-reflective surfaces and multi-junction cells increase efficiency.

[3 marks]

.....

.....

.....

.....

.....

.....

.....

0 1

. 3

Use Table 1 to suggest which cell type would be chosen for a large solar farm on cheap desert land and which for a satellite. Justify your choices.

[3 marks]

.....

.....

.....

0 1 . 4

Explain why solar PV output is intermittent **and** unpredictable.

[2 marks]

10

0 2 . 1

Explain how a ground-source heat pump can deliver more heat energy to a building than the electrical energy used to run it.

[3 marks]

0 2 . 2

Explain how Concentrating Solar Power (CSP) with thermal storage overcomes the intermittency of solar power.

[3 marks]

02 . 3

Explain why CSP can only be used in areas with little cloud, whereas PV can be used anywhere.

[2 marks]

02 . 4

Describe **two** environmental impacts of solar PV.

[2 marks]

1

2

10

03

A rural community in Pakistan is considering a low-head helical (Archimedes screw) turbine on a river rather than joining a high-head dam scheme.

03 . 1

Explain why low-head turbines are more suitable than high-head HEP schemes for many rural areas.

[5 marks]

03 . 2

Suggest **one** reason why such schemes may not be installed even at suitable sites.

[1 mark]

03 . 3

The maximum flow rate at the site is $6.5 \text{ m}^3 \text{ s}^{-1}$ giving an output of 100 kW at 90% turbine efficiency. At 10% of maximum flow the efficiency falls to 40%. Calculate the output at 10% of maximum flow.

[2 marks]

Answer kW

03 . 4

Outline **two** ways a high-head reservoir can affect the river downstream.

[2 marks]

04

The kinetic energy available to a wind turbine is proportional to the cube of the wind velocity. Table 1 shows mean wind velocities at four possible wind farm sites.

Table 1

Site	Mean wind velocity / m s^{-1}	Distance to grid / km	Other features
A: upland ridge	9	12	Migrating bird route; peat bog
B: coastal farmland	8	3	Near village
C: offshore shallow sea	10	15	Sandbanks
D: inland plain	6	2	Arable farmland

0	4	.	1
---	---	---	---

Calculate how many times more kinetic energy is available at site C than at site D.

[2 marks]

Answer

--

times

0	4	.	2
---	---	---	---

Use Table 1 to evaluate the four sites for a large wind farm.

[5 marks]

0	4	.	3
---	---	---	---

Give **two** advantages of vertical axis wind turbines (VAWTs) over horizontal axis turbines (HAWTs).

[2 marks]

0	4	.	4
---	---	---	---

Explain how direct-drive turbines improve on turbines with a gearbox.

[1 mark]

10

0 5 . 1 Explain the locational requirements for harnessing wave power.

[2 marks]

0 5 . 2 Describe how **one** named wave power device generates electricity.

[2 marks]

0 5 . 3 Give **two** design problems that have delayed the development of wave power.

[2 marks]

1

2

0 5 . 4 Compare the environmental impacts of tidal barrages, tidal lagoons and in-stream tidal turbines.

[4 marks]

10

0 6

Figure 1 shows the water level inside and outside a tidal barrage over one 12.5-hour tidal cycle and the periods when electricity is generated.

Figure 1

0 6

. 1

Use Figure 1 to explain when electricity is generated by the barrage.

[2 marks]

0 6

. 2

Explain why tidal power is intermittent but predictable.

[2 marks]

06 . 3

Explain the difference between spring and neap tides and why this affects output.

[2 marks]

.....

.....

.....

06 . 4

Explain how a tidal lagoon can be used to generate electricity when there is no tidal flow.

[2 marks]

.....

.....

.....

06 . 5

Give **two** coastal features that make a site suitable for tidal power.

[2 marks]

1

.....

2

.....

10

07 . 1

Explain **three** advantages of biofuels over other renewable energy resources.

[3 marks]

.....

.....

.....

.....

.....

.....

0 7 . 2

Explain **three** disadvantages of biofuel crops.

[3 marks]

.....

.....

.....

.....

.....

.....

0 7 . 3

Describe **two** new biofuel technologies.

[2 marks]

1

.....

2

.....

0 7 . 4

Explain how new low-temperature turbine technology could allow geothermal electricity generation in the UK.

[2 marks]

.....

.....

.....

.....

10

0 8 . 1

Evaluate the potential contribution of renewable energy resources to future energy supplies in a country such as the UK.

[9 marks]
