ENVIRONMENTAL SCIENCE**Paper 2 (Generated practice paper - Set 02)**

Assessed: The living environment, Biological resources, Sustainability, Research methods

Time allowed: 3 hours**Materials**

For this paper you may use:

- a calculator.

Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions 1 to 10 and **one** essay from question 11.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- Do all rough work in this book. Cross through any work you do not want to be marked.

Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 120.
- All questions should be answered in continuous prose.
- You will be assessed on your ability to:
 - use good English
 - organise information clearly
 - use specialist vocabulary where appropriate.

TOTAL	

Answer all questions in the spaces provided.

0 1

Table 1 shows the catch made by a shrimp trawler during one fishing trip.

Table 1

Component of catch	Mass / tonnes
Shrimps (target species)	0.6
Crabs, sea urchins, molluscs and starfish	5.9
Immature fish of commercial species	1.9

0 1

. 1

Calculate the percentage of the total catch that was by-catch.

[2 marks]

Answer

%

0 1

. 2

Explain why shrimp trawling produces such a high proportion of by-catch.

[1 mark]

0 1

. 3

Explain why k-selected species such as the common skate and the Greenland shark are especially vulnerable to overfishing.

[3 marks]

0 1

. 4

Evaluate the methods that can be used to reduce the environmental impacts of fishing.

[9 marks]

Extra space

15

0 2 . 1

State the Brundtland Commission definition of sustainable development.

[1 mark]

0	2	.	2
---	---	---	---

Explain the difference between a negative feedback mechanism and a positive feedback mechanism, giving **one** example of each in the climate system.

[4 marks]

0	2	.	3
---	---	---	---

Explain why a diverse ecosystem is more likely to resist change than an agroecosystem.

[1 mark]

0	2	.	4
---	---	---	---

Evaluate the extent to which copying the principles of natural systems could make human activities more sustainable.

0 3 . 1

Which of the following is a feature of natural systems? Tick **one** box.

[1 mark]

A Reactions that require high temperatures

☐

B Reliance on non-renewable energy

☐

C Waste products that are the raw materials for other processes

☐

D Dispersal of elements so they cannot be re-used

☐

0 3 . 2

Explain why nitrogen fixation by bacteria is more sustainable than the Haber process.

[2 marks]

.....

.....

.....

.....

0 3 . 3

Explain why incineration of wastes is less sustainable than natural decomposition.

[2 marks]

.....

.....

.....

.....

5

0 4 . 1

Which of the following is an example of habitat destruction rather than a change in abiotic factors? Tick one box.

[1 mark]

A Thermal pollution of a river by a power station

☐

B Flooding a valley to create a reservoir

☐

C Lowering the water table by groundwater abstraction

☐

D Acid mine drainage entering a stream

☐

0 4 . 2

Give **four** human activities that cause complete habitat destruction.

[4 marks]

2

3

4

5

0 5 . 1 Explain why tropical rainforests have such high biodiversity.

[4 marks]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

0 5 . 2 Explain why rainforest species may be particularly vulnerable to environmental change.

[2 marks]

.....

.....

.....

0 5 . 3 Explain why rainforest plants and animals such as frogs are a rich source of medicines.

[2 marks]

0 5 . 4

Explain the importance of tropical rainforest for the hydrological cycle and for soils.

[2 marks]

10

0 6

Figure 1 shows the effect of increasing inputs (fertiliser, water and pesticides) on the yield of a crop.

Figure 1

0 6 . 1

Describe the relationship shown in Figure 1.

[2 marks]

06 . 2

Calculate the extra yield produced by the second unit of input and by the fifth unit of input.

[2 marks]**Answer**

units

06 . 3

Explain why, if enough land is available, spreading inputs evenly over a large area gives a greater total yield than concentrating them on a small area.

[2 marks]

06 . 4

Suggest why inputs are nevertheless often used unevenly across the world.

[2 marks]

06 . 5

Explain why intensive agriculture may be very productive but not very efficient.

[2 marks]

10

07 . 1

Give **two** wild species with potential as new food species and, for each, one characteristic that makes it useful.

[2 marks]

1

.....

2

.....

07 . 2

Explain why indigenous species may be better for domestication than introduced livestock or crops.

[2 marks]

.....

.....

.....

.....

07 . 3

Explain how species of the spinach family could help to solve a problem caused by irrigation.

[1 mark]

.....

.....

5

08 . 1

Explain how the development of biogeochemical cycles and of transpiration by land plants helped to maintain stable conditions for life.

[3 marks]

.....

.....

.....

.....

.....

.....

08 . 2

Describe **three** limitations of early methods of studying past conditions on Earth.

[3 marks]

1

2

3

0 8 . 3 Describe how each of the following modern techniques provides information about past conditions.

[4 marks]

Isotope analysis of ice cores

.....

Gas analysis of ice cores

.....

Radiocarbon dating

.....

Magnesium : calcium ratio in calcite

.....

10

0 9 . 1 Which of the following would be most suitable for monitoring the movements of a whale over several months? Tick one box.

[1 mark]

A Radio collar

☐

B Acoustic / satellite tag

☐

C Pitfall trap

☐

D Geolocator tag recovered by recapture

☐

0 9 . 2 Explain why post-release monitoring is important in a captive breeding and release programme and describe **two** suitable methods.

[4 marks]

.....

.....

5

1 0 . 1

Explain why the potential to increase food supplies by cultivating new land is limited.

[2 marks]

1 0 . 2

Explain why importing food may reduce the availability of food in the area where it is produced.

[2 marks]

1 0 . 3

Explain why organic agriculture is more than simply 'not using pesticides and artificial fertilisers'.

[2 marks]

1 0 . 4

Evaluate the strategies that could be used to make agriculture more sustainable.

Write an essay on one of the following topics.

$$\boxed{1} \boxed{1} . \boxed{1}$$

Fishing is the last large-scale human hunting activity. Discuss the environmental impacts of fishing and evaluate the methods used to make the exploitation of fish populations sustainable.

[25 marks]

OR

1 1 . 2

Discuss the methods that can be used to conserve biodiversity and evaluate their effectiveness.

[25 marks]

Indicate which question you have answered by writing its number, **11 . 1** or **11 . 2**, at the top of your answer.

[illegible]

[illegible]

Do not write outside the box
